

Coastal Biodiversity Survey

<http://cbsurveys.ucsc.edu/>

Voucher specimens were collected from 12 survey sites between November 2002 and July 2003. Sites sampled between 2001-2002 were sorted into regional groups based on biological similarity. Representative sites were chosen for the voucher collection. A sample of each species included in the Survey data was collected. Samples of algae were pressed and are housed at the University of California Berkeley Jepson Herbaria. Photographs of the pressings may be viewed at:

<http://cbsurveys.ucsc.edu/surveydesign/vouchers.html>

Invertebrates collected are preserved in 95% ethanol and are housed at the California Academy of Sciences. Sensitive species were not collected, large species such as sea stars and anemones were photographed instead of collected.

Fraser Point, Santa Cruz Island, California
Species collected January 17, 20, & 31, 2003

Acanthina sp
Aglaophenia latirostris
Amphissa versicolor
Balanus glandula
Cancer antennarius
Chthamalus sp
Epitonium tinctum
Fissurella volcano
Lacuna sp
Lepidochitona hartwegii
Littorina keenae
Littorina scutulata
Lottia digitalis
Lottia limatula
Lottia paradigitalis/strigatella
Lottia pelta
Lottia scabra

Lottia scutum
Mopalia lionata
Mopalia sp
Mytilus californianus
Nucella emarginata
Nuttallina californica
Pachygrapsus crassipes
Pagurus hirsutiusculus
Pagurus samuelis
Phragmatopoma californica
Pollicipes polymerus
Pugettia producta
Septifer bifurcatus
Strongylocentrotus purpuratus
Tegula funebris
Tetraclita rubescens
Tubularia sp
