

Coastal Biodiversity Survey

<http://cbsurveys.ucsc.edu/>

Voucher specimens were collected from 12 survey sites between November 2002 and July 2003. Sites sampled between 2001-2002 were sorted into regional groups based on biological similarity. Representative sites were chosen for the voucher collection. A sample of each species included in the Survey data was collected. Samples of algae were pressed and are housed at the University of California Berkeley Jepson Herbaria. Photographs of the pressings may be viewed at:

<http://cbsurveys.ucsc.edu/surveydesign/vouchers.html>

Invertebrates collected are preserved in 95% ethanol and are housed at the California Academy of Sciences. Sensitive species were not collected, large species such as sea stars and anemones were photographed instead of collected.

Pigeon Point, San Mateo County, California

Species collected November 3, 20, & 21, 2002

Alia sp

Amphissa versicolor

Balanus glandula

Bittium eschrichtii

Chthamalus sp

Cyanoplax sp

Lacuna sp

LBL (little black limpet)

Leptasterias sp

Littorina keenae

Littorina scutulata

Lottia digitalis

Lottia limatula

Lottia paradigitalis

Lottia pelta

Lottia scabra

Lottia scutum

Mopalia muscosa

Mytilus californianus

Nitidiscala tinctoria

Nucella emarginata

Ocenebra interfossa

Onchidella borealis

Pachygrapsus crassipes

Pagurus granosimanus

Pagurus hirsutiusculus

Pagurus samuelis

Pollicipes polymerus

Pugettia producta

Spirorbis sp

Tegula brunnea

Tegula funebris

Tonicella lokii
