

Coastal Biodiversity Survey

<http://cbsurveys.ucsc.edu/>

Voucher specimens were collected from 12 survey sites between November 2002 and July 2003. Sites sampled between 2001-2002 were sorted into regional groups based on biological similarity. Representative sites were chosen for the voucher collection. A sample of each species included in the Survey data was collected. Samples of algae were pressed and are housed at the University of California Berkeley Jepson Herbaria. Photographs of the pressings may be viewed at:

<http://cbsurveys.ucsc.edu/surveydesign/vouchers.html>

Invertebrates collected are preserved in 95% ethanol and are housed at the California Academy of Sciences. Sensitive species were not collected, large species such as sea stars and anemones were photographed instead of collected.

Taylor Point, Olympic National Park, Jefferson County, Washington
Species collected July 15, 2003

<i>Alia</i> sp	<i>Lottia paradigitalis</i>
<i>Balanus glandula</i>	<i>Lottia pelta</i>
<i>Cancer oregonensis</i>	<i>Lottia scutum</i>
<i>Chthamalus</i> sp	<i>Mopalia</i> sp
<i>Crisia</i> sp	<i>Mytilus californianus</i>
<i>Haliclona</i> sp	<i>Mytilus galloprovincialis/trossulus</i>
<i>Heptacarpus</i> sp	<i>Nucella emarginata</i>
<i>Idotea</i> sp	<i>Nucella lamellosa</i>
<i>Katharina tunicata</i>	<i>Onchidella borealis</i>
<i>Lacuna</i> sp	<i>Pagurus hirsutiusculus</i>
LBL (little black limpet)	<i>Pisaster ochraceus</i>
<i>Lepidochitona dentiens</i>	<i>Pista elongata</i>
<i>Lepidochitona</i> sp	<i>Pugettia producta</i>
<i>Lepidozona</i> sp	<i>Pugettia richii</i>
<i>Leptasterias</i> sp	<i>Semibalanus cariosus</i>
<i>Ligia</i> sp	<i>Sertularella turgida</i>
<i>Littorina scutulata</i>	<i>Sphaeromatid isopod</i>
<i>Littorina</i> sp	<i>Tegula funebris</i>
<i>Lottia digitalis</i>	<i>Tonicella lineata</i>
<i>Lottia ochracea</i>
